

School is a place where we learn, face an exam. Life is one where we face an exam and then we learn things.

So when a student transforms from a school to a more practical school called life, why are some successful and what is it that the others are lacking?

Here comes certain terms like attitude, personality, character, temperament, commitment and beyond all a brave heart to face life. Let us not complicate the issue by using above terms.

Let us simplify by one single word wisdom. Now, the question comes, what is this wisdom ?

Might sound small, But it is the key which can open all the above locks.

Now let me ask you what is knowledge and what is wisdom?

There is a very thin line of Difference between knowledge and wisdom. But that very thin line makes the difference between winning and losing.

---

In simple words, a nuclear weapon can be created with knowledge. But its proper usage comes with wisdom.

By Now, it might be very clear for all of us as to why knowledge is being misused ?

The Answer is we lack wisdom while acquiring knowledge.

[So where do we get this wisdom?](#)

Again, I need to tell you a small story.

In Ancient times, we heard of people going to gurukula to study

It was residential, where, in addition to knowledge, wisdom was being taught to children. Irrespective of whether the learner was a prince or a farmer's son.

It was a place where it was taught how to create a weapon and whether it should be used for a constructive or destructive cause.

---

In Today's world, with too much of competition in every field, knowledge induction has vastly increased with a steady steep in wisdom.

It is grave time, where we understand the need of the hour. The Nations pride now rests on the shoulders of the young brains which are fruitful with knowledge and empowering wisdom.

Let's accept the fact that right from our grand fathers, our country has been termed as Developing.

Let's think of a nation, free from all the pollution at least a hundred years from now.

To dream such a nation with no starving deaths, basic right of education, every kid blushing without the shadows of demons like caste, creed, sex.

A change is always necessary.

The only solution for such a change can come from wisdom.

Let me give some examples

---

A wisdom filled heart thinks of the world, nations pride, mother, individual identity. As the saying goes, one who can never respect his nation and his mother can never win as a human being.

Let us question at this moment as to how many of us are being taught the above things.

A wisdom filled heart stands against corruption, just like the way one breathe oxygen

So, if we dream of a nation with full of wisdom hearts, then our nation will stand on top not only in population but also in any marked event.

The very thought can create goose worms to every individual. Why not take a primary step in implementing it.

After all, a thousand mile run chase begins with a single step

Today, these words can take the form of a single step for a change, we dream of a brighter future generations.

---

Abdul Kalaam sir said

Dare to dream-Dream to Achieve

Every one of us can dream

How many of us can really achieve ?

I end with a sharp note that words are swords.

They can penetrate deeply in ones heart which can imprint a change which the future is awaiting eagerly.

Every body dreams of a nation with such vast knowledge

A Mind and soul with proper knowledge and fruitful wisdom is what our country really needs.

We might know how a sulphuric acid is produced. But we do not know where to use it.

Knowledge cannot buy wisdom

Wisdom is samskaram

No one has time to learn wisdom

If people understand the importance of wisdom

---

So called problems are all lost

Many countries after 5 years of independence were listed as Developed Countries

We after 60 years of independence still remain a developing country

At least let me hope, my grand son comes to me saying India is a developed country.
